4 Reasons to Visit Booth #2041 at ITC 2017

[GDP](#) and [Acroamatics](#) are excited to present their latest telemetry products and systems at the [International Telemetering Conference](#) at Bally's Las Vegas on October 24-26. Visit **booth #2041** to see...

1. Demonstrations of new Multi-Band Range Telemetry Receivers - designed with the latest technology to provide Adaptive Equalization, LDPC, STC, direct TMoIP output and DQE encapsulation.
2. New Windows application independent high rate real-time Decom & EU processing products in compliance with DOD Windows 10 SHB and DISA STIG requirements.
3. Test drive new TRMS Range Management software; used to configure, setup and activate missions, as well as generate post mission reports.
4. Discuss your challenging requirements with our experts.

Don't forget to visit [Ampex](#) and [Delta Digital Video](#) next door. They will be featuring new [Machine Learning & Cyber Security](#) capabilities and demos of [H.265 Encoding Technology](#).

International Telemetering Conference

October 24 - 26

Bally's Hotel & Convention Center

Las Vegas, NV

Booth #2041

Coming Soon...High Speed Network Recorder

At ITC next month, we will be introducing the new Model 3500. GDP's Model 3500 is a high data rate, telemetry range compatible, large capacity streaming network recorder that has been designed for demanding requirements and delivers consistent, reliable performance in challenging conditions. **Be the first to see it at booth #2041.**

We Put Quality First

We're committed to serving our government and commercial markets with the highest levels of customer satisfaction. Our

dedicated employees strive to deliver effective quality management, comply with security requirements, and drive continuous improvements. [Certified AS 9100D / ISO 9001:2015](#)

Booth #2041

When Performance Matters

At the Delta family of companies, we are committed to meeting the exacting requirements of the Military & Aerospace communities.

From Information Assurance and Standards Compliance to Cyber Security and Quality Assurance, your success is our mission.

Visit **Booth #2041** to see solutions for video processing, range telemetry systems, and the acquisition, exploitation, and protection of data for land, sea, air and space applications.

Multi-Band Telemetry Receivers - Designed with the latest technology to provide Adaptive Equalization, LQPC, STC, Direct Readout, Channel 10 and CDR outputs. End-to-end network, cosmic telemetry protection, Band Source, Data Transport, and Link Test.

ACROAMATICS - Windows application independent high rate real-time stream & I/O processing products in compliance with CDD Windows 10 S4E and DSA STC requirements.

DELTA - Plugged airborne avionics utilizing real H.265 video compression for high quality HD or SD video transmission at half the bit rate.

AMPEX - New products providing complete data management and cognitive analysis capabilities, as well as cyber protection for storage, processing and networked systems.

Designed & Built in the U.S.A. www.Delta-Info.com

Featured Product - Model 3022 'Lunchbox'

[Model 3022AP](#) merges the power of a high performance telemetry processing solution into a portable, 'all-in-one' telemetry data acquisition, processing, and analysis device. It combines a PCI receiver card with data processing cards and software. Model 3022AP is popular with missile production and test, UAV and targets, and deployable telemetry system users.
